2014 HEALTH REQUIREMENT UPDATE

AS OF JULY 21, 2014

Due to recent outbreaks of Vesicular Stomatitis (VS) and the West Nile Virus throughout Colorado, New Mexico, and Texas the Department of Agriculture is making it mandatory that all exhibitors entering the 2014 Colorado State Fair have a **5 day old health prior to arrival to the Colorado State Fairgrounds.** We are asking that you ask your vets to check for signs of VS and West Nile when getting your health check papers. Please have them write on the Health papers that horses were checked for these two diseases.

If any further outbreaks occur this summer prior to fair we will issue a more severe Health Requirement so please check the website for updates prior to coming to the Fair. www.coloradostatefair.com

Thank you all for your cooperation in this matter.

Sincerely,

Lindsay Wadhams

Colorado State Fair Horse Show Coordinator
